the benefits and  
value-added services  
provided by Lowney  
Associates for this  
project, please call.

**Alza Corporate Center** Lowney Associates performed geotechnical investigations for three 4-story corporate office buildings, two 3-story laboratory buildings and proposed modifications to a creek levee owned by the Valley Water District. Construction observation and testing services are now being provided for the office buildings. The steel-frame office buildings, totaling 360,000 square feet, will be constructed over one level of concrete-framed podium parking. This project was ranked 16th of The Top 50 Projects in California by *California Construction Link*, March 1999. The architect is Hoover Associates.
